

What is NLP (Neuro-Linguistic Programming)?

NLP has been defined in many different ways:

- The art and science of human excellence
- The knowledge of how mind (neuro) and language (linguistic) interface to create our internal programs and our reality (programming)
- The study of people and how they process information about the world around them
- The study of human transformation
- The art and science of how people change

NLP is a branch of cognitive psychology.

It contains a **hugely powerful set of techniques** for personal and organisational communication & change. NLP is used by business leaders & managers, personal coaches, therapists, psychologists, counsellors, psychiatrists, parents, teachers and trainers. It benefits anyone who is interested in transforming their life, their relationships, their business or their career, and helping others to do the same.

In essence, NLP describes how we think, how we communicate, how we create our own 'map' of the world, and how we can change any of that if we choose to.

Why become a Certified NLP Practitioner?

NLP can help you to:

- Think differently and more creatively;
- Maintain a calm, confident emotional state, whatever the circumstances
- Communicate with anyone assertively & persuasively;
- Build rapport and understanding fast with colleagues, clients & anyone else.
- Eliminate personal blocks to progress & success.

NLP techniques are the best processes available for **effective communication**, giving your message impact, confidence and influence. In addition NLP can create **fast and long-lasting change** in your life and business. Many other systems are good at discovering problems but don't give you tools for painless, fast change. During the training, you will witness immediate and real transformations of mind.

Certification as an NLP Practitioner is a benchmark qualification confirming you understand the theoretical components of NLP Practitioner content, and can demonstrate competency using NLP skills in practical situations.

The Breakthrough Dynamics Certificate is recognised by the Association of NLP in the UK, for their full membership criteria, and endorsed by the International Network for Humanistic Neuro-Linguistic Psychology.

Who will be leading the NLP Practitioner training?

The course will be led by **Justin Tipper, Certified Trainer of NLP.**

Justin has been using NLP in business and therapy for more than 15 years, and continues to lead Breakthrough Dynamics and NLP into new areas on the Isle of Man, in the UK, and beyond. For example, he has run transformational training courses within the social care sector, within financial institutions, in sports, in shipping, and within Government.

Justin says “Some time ago, I was in a job that I found rewarding in part, but also frustrating, as I was aware that there had to be so much more I could do and achieve, **if only I knew how.**”

By chance, I discovered some stuff on NLP, and immediately decided to book myself on a course to learn more. I have never regretted the opportunity that came my way, and now I have created a business in which I truly feel that I am doing my life’s work – that is, to directly assist people to be the best, the most excellent, the most outstanding, in their chosen fields.

We have even bigger and brighter plans for the future, and I can only see that the study of NLP is transforming what we consider is now possible, and achievable.”
